COMPLIANCE SUPPORT–

WITHOUT COMPROMISING ON ACCURACY

Marine inspections and surveys may be governed by different requirements depending on the vessel's flag, class, equipment, survey type and applicable national or international regulations.

Solanki Ship Care coordinates inspection, testing and survey-support services according to the agreed scope and applicable requirements. Where a survey, test or certification requires an authorized organization, recognized service supplier, competent person, flag-State authority or classification society, the applicable approval and certification requirements are respected.
